DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 6-12, drawn to a nanohorn article.

Group II, claim(s) 14-30, drawn to a method of making a nanohorn article.

2. The inventions listed as Groups I do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: In the instant case the technical feature "nanohorns" in an aggregate are known in the art and therefore do not relate to a single inventive concept (see rejection JP 2001-036361 below).

3. During a telephone conversation with Mathew Jacobs on 10/25/2005 a provisional election was made with traverse to prosecute the invention of Group I, claims 14-30. Affirmation of this election must be made by applicant in replying to this Office action. Claims 14-30 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1775

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 6-12 are rejected under 35 U.S.C. 102(b) as being anticipated by (JP 2001-036361).

6. Regarding claim 6, the reference teaches nanohorns in a paste (bonded and carried) (translation claim 1).

7. Regarding claims 7 and 8, the nanohorns are fixed on a base material (the paste) (see paragraphs 0008-0010 and 0023 of translation).

8. Regarding claim 9 and 11, the base material is inherently has an arbitrary or variable shape.

9. Regarding claim 10 and 12, the substrate (base material) is a boro-silicate glass (0012) and the carbon nanotubes project from the surface of the fixing material after being etched to expose them (0019 and 0023).
